

ZAYOX - 23 (ANTIFREEZING AGENT)

ZAYOX - 23 USED IN ALL SC FORMULATION.

Technical Specification

Solubility	- 100%	Color	- Clear Viscous Liquid
pH	- 5.50 to 8.50	Form	- Liquid
Specific Gravity	- 1.0 to 1.05	Dose	- 2% to 5%
Bulk Packing Size	- 200ltr		

Application

ZAYOX - 23 is specifically used when preparing **SC (Suspension Concentrate) formulations for:**

- | | |
|--|---|
|  Insecticides |  Fungicides |
|  Herbicides |  Plant Growth Regulators |

The agent is always used mixed into these formulations to protect them from freezing damage

Functions & Benefits

- **Freeze point suppression** : These agents are mixed with the water in the formulation to lower the temperature at which it will freeze.
- **Stability** : They ensure the formulation remains stable and doesn't freeze during storage, which could cause the active ingredient to settle out or the suspension to break.
